

Construction & Infrastructure Steel

Product Brochure

Overview

Structural sections and flat steel for residential, commercial, and infrastructure construction.

Products in This Range

- **I-Beam** — Hot rolled structural I-section (ISMB series) for columns, beams, and heavy structural framing.
- **H-Beam** — Wide-flange hot rolled H-section for heavy structural columns and high-rise construction framing.
- **MS Channel** — Hot rolled C-section (ISMC series) for purlins, framing, and general structural support.
- **MS Angle** — Equal and unequal leg mild steel angle bar for structural framing, brackets, and towers.
- **Steel Girders** — Custom-fabricated plate girders, built up per structural drawing for long-span and heavy-load applications.
- **Hot Rolled Coil (HRC)** — General-purpose hot rolled steel coil for structural fabrication, pipe manufacturing, and general engineering work.
