

Heavy Industrial Steel Applications

Product Brochure

Overview

Structural sections, rail, and plate products for heavy industrial facilities and material-handling systems.

Products in This Range

- **H-Beam** — Wide-flange hot rolled H-section for heavy structural columns and high-rise construction framing.
- **Steel Girders** — Custom-fabricated plate girders, built up per structural drawing for long-span and heavy-load applications.
- **MS Rail** — Light and crane rail sections for overhead crane runways and material-handling track systems.
- **HRC Chequered Plate** — Hot rolled steel plate with a raised chequered (diamond/lentil) pattern, providing slip resistance for flooring and walkway applications.
